HKIL is proud and privileged to be associated with different Government Departments/Agencies in their e-Governance initiatives. HKIL has successfully undertaken e-Governance Projects and this sector remains a focus area for the Company.

Portal Development

In today's world of fast-changing business requirements for enterprises, Portals provide an efficient way of sharing of information and collaboration with both internal and external customers; streamlining and consolidation of business operations through automation of processes. This helps organizations achieve improved inter-business communication and optimization of costs, thereby giving them the competitive edge. HKIL delivers Portal solutions to enterprises with varied functionalities so that they achieve these goals:

- **e-Commerce Portals**
- **Business Application Portals**
- **Enterprise Information Portals**

Customer Support

Our alert and responsive Customer Support Team is committed to achieve the mission of Customer Delight by ensuring them better value. This team, monitored and guided by the Product Support Team operating from the Software Development Center in Kolkata comprises of a team of professionals from HKIL and it's extended family of Business Partners.

These products have a successful track record in various **Nationalized Banks, Gramin Banks (RRBs), Co-operative Banks and Credit Societies.**

- **Total Branch Automation (TBA)**
- **Any Branch Banking**
- **ATM Switch**
- **Card Management Software**
- **Core Banking Solution (CBS)**

BANCAL® Banking Calculator

HKIL entered the Banking Automation sector by introducing the Banking Automation Product, **BANCAL®** in 1988. This product was truly ahead of its times as no significant automation initiatives were there for the Banking Industry till then.

This “**Banking Calculator**”, as it was referred to, was a chip-based **Back-office Automation Solution for Banks**, which enabled them to significantly improve their efficiency levels by automating functions like interest calculations, ledger postings, report generation etc. The product was a huge success and it was commissioned by almost all the Banking Establishments in the country till the advent of the new generation personal computers.
